# Project Overview

# Tools

Project Tracker- Trello: 2

VCS Repository- Github: 4

Database- MySQL: 5

Testing- JUnit: 3.5

Auto-documenter- JavaDoc: 4

Deployment environment- Android Studio: 2

# Trello

Rating: 1

Comments:

- Bad for small projects
- Not the best project tracking software out there (though may be best free one)
- Potentially useful with larger teams

# Git/Github

Rating: 4

Comments:

- Effective and free version control
- CLI is not always easy to use
- Merging is not done in a user friendly manner

# How we Built it
