Awake+

Mikhail Chowdhury, Jordan Peters,
Justin Schiller & Sam Skolnekovich

Project Overview

- ★ App for Android Devices
- ★ Gamified Alarm
- ★ Earn points by waking up on time
- ★ Redeem points for coupons to local restaurants such as the Village Coffee Shop

Tracker: Trello

VCS: Git/Github

Rating: 1

Rating: 4

- Bad for small projects
- Not the best project tracking software out there (though may be best free one)
- Potentially useful with larger teams

- Effective and free version control
- CLI is not always easy to use
- Merging is not done in a user friendly manner

Database: MySQL

Rating: 5

➢ Easy to learn
➢ Efficient and user friendly
➢ Create and populate database with one short file

Testing: JUnit

Rating: 3.5

❖ I HAVE NO IDEA

Documentation: Javadocs

Rating: 4

❖ Documentation easy to write
❖ Tags create smooth process
❖ Automatically integrated with Android Studio

Deployment/Framework: Android Studio-> Android Phone

Rating: 2

- ❏ Problems transfering app to phone
- ❏ Not as easy to use as Eclipse
- ❏ NEED MORE HERE

Challenges We Faced

➢ Understanding existing Android Clock code
➢ Transferring app to phone
➢

Demo
